

Please replace claim 1 with the following "clean version" of the amended claim.

- (B1)*
1. (once amended) A boat propeller safety enclosure, comprising:
- (A) a cover having a first side having a shape and a second side having an opening having an adjustable size, and having a second opening for drainage;
 - (B) an insert panel within said cover defining said shape of said first side;
 - (C) a cinch region on said second side of said cover, said cinch region defining said size of said opening.
-

Please replace claim 7 with the following "clean version" of the amended claim.

BW > 7. (once amended) A boat propeller safety enclosure, comprising:

P2
a generally bag shaped cover having an opening and comprising a mesh material
and having a cinch region defining said opening, and wherein said bag
shaped cover is sized and shaped to adopt the general shape of a
propeller when installed and cinched tightly about the propeller.

Version of claim 1 with "markings to show changes made."

1. (once amended) A boat propeller safety enclosure, comprising:
 - (A) a cover having a first side having a shape and a second side having an opening having an adjustable size, and having a second opening for drainage;
 - (B) an [inset] insert panel within said cover defining said shape of said first side;
 - (C) a cinch region on said second side of said cover, said cinch region defining said size of said opening.

Version of claim 7 with "markings to show changes made."
